## **FOUNDATION**

### **Report to EFORT:**

During my fellowship I studied and experimented with professional tools in:

1. Joint replacement surgery in particular anterior approach of the hip.
2. Revision joint replacement.
3. Collegial attitude while working and making friends even after working hours.
4. Development in my professional class in the hospital.
5. My fellowship in Rizzoli gave me experience and impression of the beauty of Italy and left a professional and personal imprint on me.

For the sake of professional advancement, I chose Rizzoli medical center in order to learn new surgical approaches in the field of joint replacement. All this is to be used in the future and take advantage of the knowledge I have acquired and bring it to the hospital where I work.

I learned all the steps, starting with the patient receiving, supporting and explanation, accompaniment and participation in surgeries.

I learned about the surgery complications intraoperative and postoperative.

# EFORT FOUNDATION

I was also given the opportunity to perform surgery under the guidance of Prof. Faldini which gave me a key to gaining a great deal of experience.

I learned to monitor patients well after surgery and to know fast postoperative rehabilitation methods.

I also had the opportunity to join the clinics at the hospital together with the doctors and give an extended explanation to the patient before and after the surgeries.

During the fellowship I participated in a number of orthopedic conferences through which I acquired many and varied professional tools.

My joining to the team was quick and good, so in this occasion I would like to thank the team who helped me a lot during my experience specially Prof. Faldini who considered one of the best in this field in the world.

My good social relations gave me the opportunity to also attend family parties and a trip with my friends during this time.

In my warm recommendation I expressed my willingness to send a young intern to Prof Faldini to allow him promotion and study as I gained.

I currently work as a responsible of joint replacement surgery at the hospital where I am employed.

# EFORT FOUNDATION

For conclusion, I want to show that Rizzoli medical center is one of the best hospital in the world and also Prof Faldini is very recommended person to work and learn with.

I would like to take this opportunity to thank you for the financial support that allowed me to learn and gain more experience.
